

# THE CURRENT WEATHER REPORT LIVE FROM TYROL

## WEATHER IN SERFAUS-FISS-LADIS

Your holiday is approaching swiftly and the anticipation is growing. The first question that comes to mind: How is the weather going to be in the Alps of Serfaus-Fiss-Ladis? All current weather data and daily trends, including forecast for the upcoming days, are available at a glance now!

**today, Thursday 09.05.2024**

With gradually increasing high-pressure influence, there will still be many dense clouds or cumulus clouds on Thursday, but during the course of the day, they will slowly make some room for the sun especially over the valleys. The risk of rain showers is no longer too high. A weak high-pressure influence should prevail towards the weekend, and the sun will often shine with temperatures typical for this season. In the afternoons, some cumulus clouds will repeatedly form over the mountains, but the possibility of some rain showers, possibly even thundershowers, is expected to increase again only on Sunday afternoon. At the beginning of the new week, more humid and unstable air masses will arrive, raising the risk of rain showers.
